

Computer-Assisted Instruction Software for Nursing

Instructions:

The following list contains all currently installed software on the twelve Nursing systems located in the Academic Assistance Center. All items may be accessed by using the Start / Programs menu.

- There are two major categories: **(CD-ROM Software)** and **(Non CD-ROM Software)**. Within these two categories, all of the programs are listed as detailed below.
- Underlined items are groups of programs. Select the appropriate group first to locate the titles listed beneath it.
- Items following the arrowed bullets (➤) are the actual program titles as they are listed within the Start menu on each system.
- Items following the round bullets (●) are menu items within the programs, and these do not appear until the program begins. Note that this listing of internal menu items is incomplete. It is provided solely as a convenience, and the actual group name and program title must be known in order to correctly access the desired content.

This document was last modified April 22, 2008.

(CD-ROM Software)

The following CD titles are available in the listed quantity at the AAC Checkout Desk...

	<i>Quantity</i>
➤ Clinical Examination	4
➤ CM Fractures & Immobilization F&I	
➤ Nursing Assessment of the New Family	
Gestational Age	1

Assessment of Postpartum	1
➤ Nursing - Psychomotor Skills Series	
Care of a Central Venous Line	1
Care of a Subcutaneous Port	1
Care of Chest Tubes	1
Peritoneal Dialysis Procedure	1

(Non CD-ROM Software)

- AACN Medi-Sim Critical Care Series
 - Gastrointestinal System
 - Neurological System
 - Pulmonary System
 - Renal System
- AccuNet Workstation
- Communication Skills - Building Rapport and Trust
- CMAP Tools Concept Mapping
- ENA Medi-Sim Emergency Nursing Series
 - Cardiac Emergencies
- Heuther Understanding Pathophysiology
 - Unit I The Cell
 - Unit II Mechanisms of Self-defense
 - Unit III Cellular Proliferation: Cancer
 - Unit IV The Neurologic System
 - Unit V The Endocrine System
 - Unit VI The Hematologic System
 - Unit VII The Cardiovascular and Lymphatic Systems
 - Unit VIII The Pulmonary System
 - Unit IX The Renal and Urologic Systems
 - Unit X The Reproductive Systems
 - Unit XI The Digestive Systems
 - Unit XII The Musculoskeletal and Integumentary Systems
- Medcin Student Edition
- Medical – Surgical Nursing.exe
- MedPrep
- Psychiatric Mental Health Nursing

Delmar's Electronic Nursing Skills

- Basic Care Nursing Skills
- Critical-Surgical Care Nursing Skills
- Intermediate Care Nursing Skills
- Special Procedures Nursing Skills

Delmar's Pediatric Nursing

- Pediatric Nursing Skills
- Pediatric Nursing Flash

Encyclopedia of Nursing Skills Vol 3 and Vol 4

- Sterile Techniques
 - Handwashing
 - Incision Care
 - Wound Care
 - Suction Drain Management
 - Staple or Suture Removal
 - Catherization
 - Surgical Asepsis
- Hygiene and Mobility
 - Hygiene and Comfort
 - Enema Administration
 - Body Mechanics and Movement
 - Oxygen Therapy
 - Measuring Intake and Output
 - Preventing Pressure Ulcers
 - Prevention of Thrombosis
 - Use of Compression Devices

Fitne Therapeutic Communication (Available on last 3 computers in each row)

- Analyze Communication
- Communication Process
- Practice Communication
- Therapeutic Communication

Mastering Clinical Skills

- Blood Administration
- Chest Tubes
- Enteral Feeding
- Epidural Analgesia
- Gastrointestinal (GI) Tubes
- Long-Term Central Venous Access Devices
- Oxygen Administration
- Patient-Controlled Analgesia
- Peripherally-Inserted Central Catheters (PICC)
- Platelet Administration
- Pulse Oximetry
- Total Parenteral Nutrition (TPN)
- Tracheostomy Tubes
- Traction
- Urinary Catheters

Mastering Medication Administration

- Medication Administration I – Oral, Topical and Inhalation
- Medication Administration II - Injectables

Medi-Sim AACN Critical Care Simulations

- Cardiovascular System II
 - Abdominal Aortic Aneurysm
 - Acute Infectious Endocarditis
 - Cardiomyopathy
 - Hypertensive Crisis
- Hematologic System
 - Anemia
 - Disseminated Intravascular Coagulation
 - Heparin Associated Thrombocytopenia
 - An Immunocompromised Patient
- Endocrine System
 - Acute Adrenal Insufficiency
 - Diabetes Insipidus
 - Diabetic Ketoacidosis
 - Thyrotoxic Crisis
- Shock Management
 - Cardiogenic Shock
 - Hypovolemic Shock
 - Neurogenic Shock
 - Septic Shock

Medi-Sim Clinical Simulations

- Maternity Nursing I
 - A Complicated Delivery: Prolonged Labor
 - A Pregnancy Complicated by PIH
 - Assessment of a Newborn
 - Normal Labor, Birth and Postpartum
- Maternity Nursing II
 - A Maternity Client at Risk
 - A Pregnancy Complicated by a Sexually Transmitted Infection
 - Adolescent Pregnancy and Prenatal Education
 - Pre-Term Labor and Care of a Premature Neonate
- Medical-Surgical Nursing I
 - A Patient with Abdominal Pain
 - A Patient with Cardiopulmonary Distress
 - A Surgical Patient with Abdominal Pain
 - An Unconscious Head-Injured Patient

- Medical-Surgical Nursing II
 - A Patient Having Surgery for Lung Cancer
 - A Patient with Chronic Renal Failure
 - An Adult Insulin-Dependent Diabetic
 - An Elderly Patient with Osteoporosis Hip Fracture
- Medical-Surgical Nursing III
 - Diabetic Foot Wound Care
 - Nursing Management of HIV Testing and Counseling
 - Nursing Management of the Adult Asthmatic
 - Nursing Roles in Promoting Breast Health
